

## Profiles of the Month June 2026

### Top business and technology requests

Are you looking for **sales partners or suppliers abroad**? You are searching for **research and innovation partners**? **Browse now** through our selection of top current profiles of the month!

#### A Romanian tarpaulin manufacturer is interested in cooperating internationally on the basis of commercial agreements

The 1994 founded Romanian company specialises in the production of a diverse range of tarpaulins, focusing in particular on four main pillars: truck tarpaulins, tarpaulins for roofs, awnings and terraces, terrace closures with transparent materials and advertising materials. The products developed by this small, yet ambitious and enduring Romanian SME are detail-oriented and client-focused. High durability, longevity and reliability are the key strengths that speak for the products. The Romanian company would like to sign commercial agreements with foreign business partners with an interest in the products commercialized by them. Further, product-related details are to be discussed with potential business partners at a later stage.

#### A metal fabrication and engineering company based in North Macedonia is looking for outsourcing or commercial agreements

A company from North Macedonia provides contract manufacturing services for metal components and structures and is developing energy-related solutions (BESS systems and digital twin applications). The company has a comprehensive portfolio of advanced metal processing and manufacturing services, delivering high-quality, customized solutions for industrial, commercial and infrastructure applications. The integrated production capabilities allow the company to support projects from single components to complex assemblies and finished products. The company seeks EU-based clients for long-term contract manufacturing, where partners provide technical specifications and collaborate on consistent, high-quality production. It also welcomes partners for joint production, particularly in metal products and BESS, contributing expertise and shared development. In addition, distributors are expected to support market expansion by promoting and selling products across regional and international markets.

### **A French company seeks suppliers of ceramic microfiltration membranes (0.2 µm) and stainless steel housing for wine tangential filtration**

A French company specialising in the design, manufacture, installation, maintenance and repair of mechanical equipment for the wine sector and industrial processes is seeking to establish a long-term supplier agreement for ceramic microfiltration membranes, along with compatible hygienic stainless steel housings suitable for tangential wine filtration. This project is part of a product development initiative aimed at optimising an existing design. The company is looking for filtration housing units available in 10, 15 and 20 m<sup>2</sup>. The partner would be skilled in membrane and filtration equipment manufacturing, with experience in the food and beverage sector, particularly wine filtration. He will be able to provide full technical documentation, CE marking where applicable, and responsive after-sales service. The partner must be able to confirm compatibility with 0.2 µm wine filtration and provide detailed technical and commercial information.
