

Profiles of the Month July/August 2026

Top business and technology requests

Are you looking for **sales partners or suppliers abroad**? You are searching for **research and innovation partners**? **Browse now** through our selection of top current profiles of the month!

Greek Automotive Component Company seeks Engine Dynamometer and Emissions Testing Laboratory for Exhaust-Diffuser System Validation

A Greek company that has developed an innovative automotive exhaust system is seeking an accredited testing laboratory or R&D facility capable of performing engine dynamometer testing and exhaust emissions analysis in motion. The goal is to independently validate performance gains and emissions compliance of the new component under controlled, standardised conditions.

Polish SME is seeking Strategic Investment and Industrial Partnerships for Structured Lipid Technology in heat-resistant Confectionery

This is a Poland-based food-tech company that develops patent-pending, thermostable structured lipid systems for high-end confectionery applications. Its trans-fat-free fat technology enables chocolate-like properties with heat resistance of up to 40 °C, thereby reducing reliance on the cold chain and improving product shelf life and quality. The company is seeking strategic investors and industry partners to drive scaling and global commercialization in the confectionery and baked goods markets.

Biometric Facial Recognition Proprietary Payment Platform and Digital Loyalty System for secure Checkout

A Romanian fintech SME has developed an innovative biometric facial recognition platform that allows cardless and phoneless digital payments directly at the point of sale. The technology integrates a software-based point of sale (SoftPOS) checkout system with a merchant loyalty program and real-time data analytics. The solution significantly reduces checkout friction and enhances security.
